WELCOME!

Welcome to our 4th annual sale! Sale preparation is really a year-around process, as we constantly assess the cattle and make breeding decisions—nonetheless, it sometimes surprises us when another year has gone by and it's sale time again. As always, it's not without a great amount of help and cooperation from so many people that this sale becomes a reality. Thanks to every one who has contributed!

The cattle have done well this year. We were blessed with a beautiful summer and plentiful grass. As always, we have fed the bulls to the benefit of their long-term health and soundness—not for short-term gain. The bulls have been developed on grass and culled stringently on soundness, disposition and do-ability.

This past year also found us doing a good amount of DNA testing. Osteoporosis (OS) is a genetic defect that has been around since the 60s in several breeds of cattle, but recently was discovered in some Red Angus bloodlines. To learn more about OS, we encourage you to visit the Red Angus website. We made the decision this summer that we'd test our entire bull offering for carriers of the OS gene. Out of over 140 samples sent in, we've only found four carriers, and those were from bloodlines we had purchased. All of the consignor's bulls have been tested free, as well. The carriers have been pulled from the sale, so you can buy with confidence that we are doing all we can to ensure the most problem-free and profitable genetic make-up of the cattle that we can.

To back up the above statement, we believe in standing behind our cattle. That's why we have the first breeding season guarantee—we want to make owning a Cross Diamond bull a benefit to your livelihood and life. We want to know if an animal didn't live up to expectations, and we want to opportunity to make it right. We enjoy the contact with our friends and customers and hope to have open lines of communication.

As we move through another year, and into the winter months, remember, "Be strong and courageous. Do not be terrified, do not be discouraged, for the Lord your God will be with you wherever you go." (Joshua 1:9) There are always challenges in production agriculture and in the cattle industry in particular, but as always, we, as the family of ranchers and farmers can meet those challenges if we keep our focus on God, our families and on this great nation in which we live.

Many blessings to you and yours in this holiday season and for the coming year!

Scott, Kim, Johanna and Marie Ford

OUR GUEST CONSIGNORS--

Brandyberry Cattle Company, Bertrand, Neb.

Cattle carry NLB prefix.

Nick, Steph, Nate, Carter and Tucker would like to welcome everyone to the 4th Annual Cross Diamond bull sale. We

would like to thank everyone for the support in last year's sale, and look forward to seeing everyone again, as well as meeting some new customers this year.

We will have bulls on this year's sale out of our Combination son and a Norseman King grandson. The bulls were run with the Cross Diamond bulls from weaning till the sale. They were culled to offer only the best on sale day. We look forward to seeing you all on sale day.

3S Cattle, Bertrand, Neb.

Cattle carry 3S prefix.

Michael, Sara, Abby, and Garrett would like to welcome everyone to the 2009 Cross Diamond sale. We hope the past year has been enjoyable for you and that the genetics you have purchased from our program have been beneficial and profitable to your program.

This year we will have seven bulls on the sale. They have been in the same environment from birth to sale day as Scott and Kim's bulls. The bulls are a representation of what we like in a bull—good feet and legs, deep bodied and easy-fleshing, above average testicle development, and good disposition. The bulls have been handled on foot, with 4-wheelers and horses to make sure every bull fits any operations handling methods.

We enjoyed visiting with everyone last year and we hope to do the same this year. It has been a pleasure to be in the Red Angus business. Last of all, we would like to thank Scott and Kim for allowing us to market a few head of bulls through their sale. It has been a privilege to work with a program that stands behind the bulls year after year.

Right ON Cattle, Bertrand, Neb.

Cattle carry MJ2N prefix.

We at Right ON Cattle Company are pleased to be involved in the 4th annual Cross Diamond sale.

We're steadily increasing our numbers of Red Angus brood cows, with the goal of providing our customers a greater selection of bulls in the sale. The base of our herd is the Miller Red Angus herd in Kentucky. These cattle have proven themselves in northern climates, as well as showing the ability to thrive on fescue and climate extremes of the south.

This year's bulls are only a few months short of two-years-old and have been developed on grass. They are sons of Romeo 478 and Epic R522- both low maintenance, good-doing bulls. We hope to continue the work started by Danny Miller in breeding sound, consistent cattle that will thrive in a variety of environments.

It has been a privilege to be associated with Scott and Kim Ford and their crew.

Choat Cattle Company, St. Edward, Neb.

Cattle carry CCO prefix.

Welcome to Cross Diamond's annual production sale. We are happy to once again have some of our bulls in the offering and thank Scott and Kim for allowing us to be part of this event.

Choat Cattle Company is a family owned operation located outside of St. Edward Nebraska. Principle operators are Wayne and Jody Choat along with their children Faith, Weston and Claire. Wayne's dad Duane helps in the day-to-day chores, and Jody's parents, Dave and Kathy Stodola are partners in the program.

Along with raising corn, beans, and alfalfa, a registered Red Angus cow herd of approximately 200 cows is maintained. Cows are wintered and calved on the family farm at St. Edward and then spend the summers raising their calves in the Nebraska Sandhills.

Our goal is to continue to produce cattle that are efficient, functional, and of course profitable for our customers. Thank you for your interest in the Choat Cattle Company program. We look forward to meeting you on December 14.

7U Ranch, Bayard, Neb.

Cattle carry LGF prefix.

Hello to all you fellow cattle people. What a change a year can make. We have been blessed with more grass this summer than we have had the last seven years, no joke. Still can hardly find the calves when they are laying down... wonderful to say the least.

The bulls this year were developed same as prior year's. Grass hay, alfalfa and five pounds of grain and then to grass. In late September, we feed them five pounds of wheat mids until we take them to Scott and Kim's before the sale.

We used some new sires for us (Mission Statement, Sakic, and Major League) and they look good. We have three Six Mile Sakic bulls in the sale, they are the first, I believe to sell in the U. S. At Six Miles's sale in April, a son of Sakic brought \$37,500, the high selling bull for them. You all will just have to come and see if they fit your program or not. We certainly have other bulls that would fit some needs. Scott and Kim always bring a good lineup from which to choose.. Thanks to Cross Diamond for allowing us to market our bulls with them. We hope to see you there.

Straka Red Angus, O'Neill, Neb.

Cattle carry DMS prefix.

Welcome to the 2009 version of the Cross Diamond Sale. We have consigned a very strong set of coming two-year-old bulls, with balanced EPD's and strong pedigrees. Those pedigrees include Straka's Dream Maker 40I4, an outstanding son of Southern King and Dream Girl-- a true mainstay in our herd, she moved on to greener pastures this spring at the age of 16. There will be a good number of sons of Straka's Taylor Made 6052. He is an easy-fleshing, heavy muscled and long-sided son of Straka's Genesis. There will be several sons of Capstone, a couple have herd sire potential. Vaquero and Cheyenne will also be represented with sons and grandsons.

We are very proud of the uniformity and eye appeal of the group of bulls. Our bulls will have had no grain before they were delivered to Scott and Kim in mid September. They know how to survive on open range and will be ready to go to work for you.

Mary and I look forward to visiting with old friends and making new ones sale day!

Thanks for your faith in our program!

2008 SALE SCENES--

JMS POLLED HEREFORDS

4850 Caldwell Ridge Rd. * Knifely, KY 42753
(270)465-6984

Danny, Janelle, Travis, Trent and Tyler

JMS Polled Herefords would like to welcome you to the 4th Annual Cross Diamond Cattle Company Production Sale. For the last three years we have participated in this event offering Red Angus

genetics as Miller Red Angus. We thank you folks for your support and hope these cattle have contributed to your program. For the last ten years, we had been running two purebred cattle operations. Our Hereford herd was established in 1975 and Red Angus was added in 1998. We developed a very good herd of Red Angus cattle, and were pleased to see them flourish when used anywhere in the country. Last year, we made the decision to focus on one breed, mainly due to the complexity of the two operations, and to increase the numbers to a single breed to give us more selection power. Mark Nelson of Bertrand, Neb. purchased the herd intact, and you will have the opportunity to purchase the genetics of this good herd of cattle here at Cross Diamond.

We selected the Hereford breed since we were already more established, and had spent over thirty years breeding and developing this herd. The Hereford herd is made up of entirely linebred Victor Domino bloodlines. The herd has been closed to outside females since 1987. Our herd is noted for calving ease, moderate frame size, and are very maternal.

We are offering a pen of these Linebred Victor Domino bulls Dec. 14th. These bulls will be a great cross on Red or Black Angus females, and can be used on heifers. You can gain the positive effects of heterosis with the first cross on heifers. The replacement females sired by these bulls will make some of the best FI Red or Black baldy females that can be produced. Pictured is a typical JMS female. Please note the many years of the JMS program in her pedigree. I will be looking forward to seeing you folks and "talking cattle" December 14th, at Cross Diamond Cattle Company.

Danny Miller
JMS Polled Herefords

Calving ease, along with moderate frame and maternal traits are trademarks of the JMS program. Following are the averages for the bulls in this year's sale:

BW	WW	YW	MM	M+G
1.6	38	61	20	39

The averages for all Hereford calves in the last year:

BW	WW	YW	MM	M+G
3.6	41	68	15	36

JMS VICTORIA 001 303, dam of Lot 164

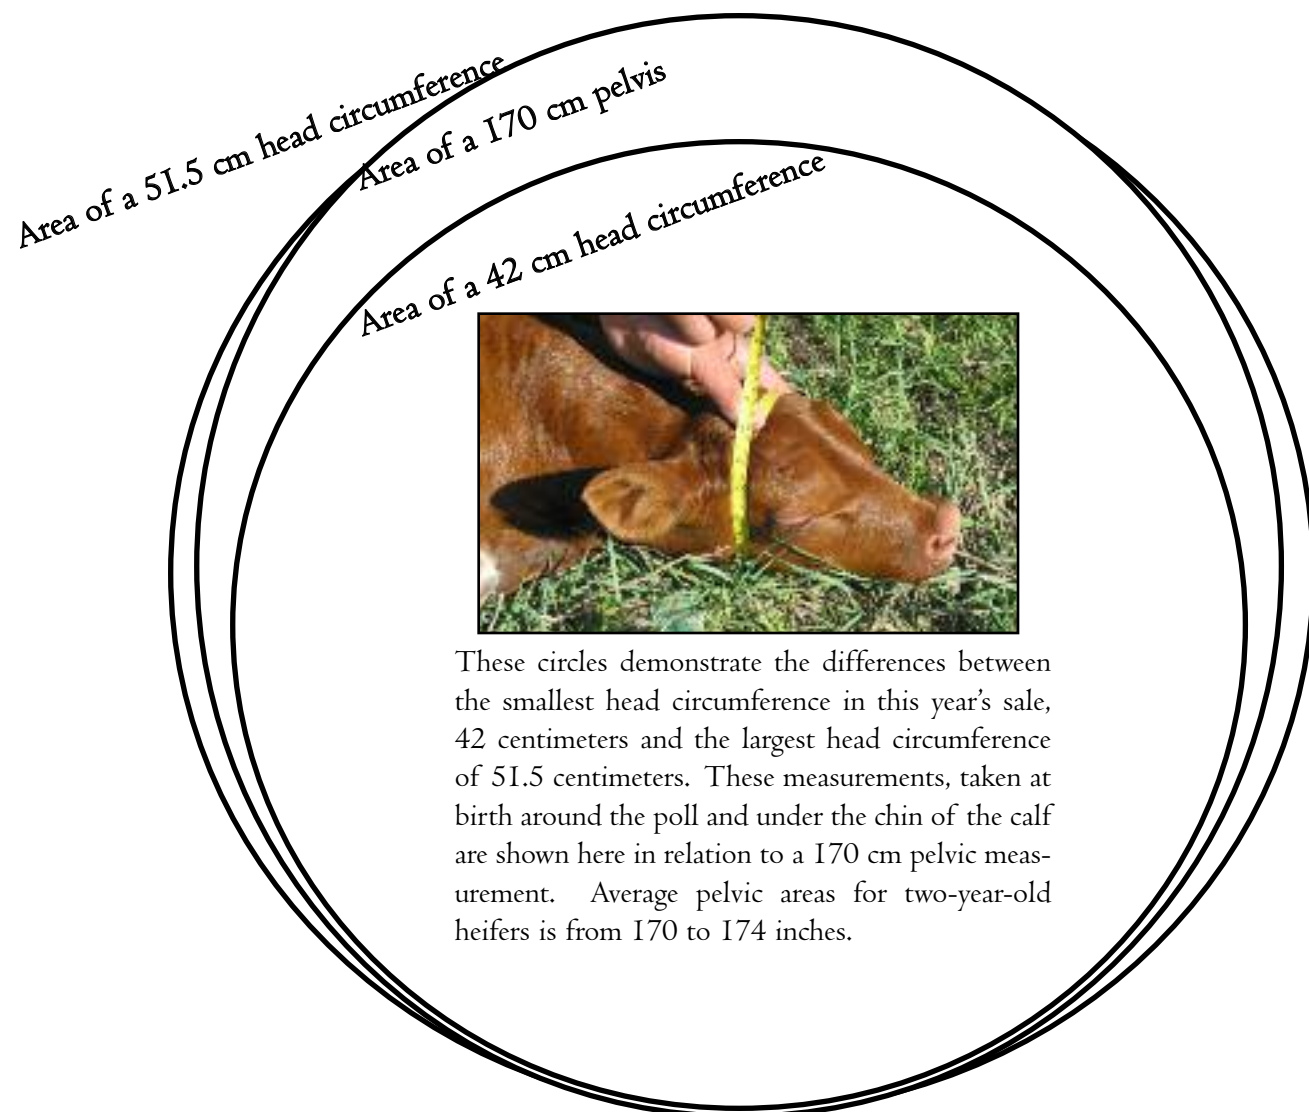

JMS VICTOR 218 343

JMS 343 has been our most influential sire the last three years. His daughters are very moderate and are making the cows we consider are the cows for the future. Several outstanding sons in this offering are herd sire prospects.

HEAD CIRCUMFERENCE GUIDE--

These circles demonstrate the differences between the smallest head circumference in this year's sale, 42 centimeters and the largest head circumference of 51.5 centimeters. These measurements, taken at birth around the poll and under the chin of the calf are shown here in relation to a 170 cm pelvic measurement. Average pelvic areas for two-year-old heifers is from 170 to 174 inches.

For the past several years, we have been taking a head circumference measurement on all calves at birth. This was a practice first initiated by Kim's parents, Doug and Linda Andersen at Panhandle Cattle Company, and after hundreds of calves to compare and analyze anecdotally, we are certain that this shape measurement is as meaningful as the birth weight measurement on newborn calves to predict future calvability in cattle.

The University of Nebraska conducted a three year study comparing the effects of EPDs, dam traits and calf traits on calving difficulties on two-year-old heifers. The study compared 550 MARC II heifers. Birth weights, head, foot, shoulder, chest and hip circumferences were all measured on the calves at birth. According to the 1997 Nebraska Beef Cattle Report, Effects of Sire EPD, Dam Traits and Calf Traits on Calving Difficulty and Subsequent Reproduction of Two-Year-Old Heifers, "Of the calf measurements, head circumference and width of shoulder measurements seem to be the most important indicators of dystocia in our data set." A high correlation between birth weight and foot circumference also indicated that the percentage of bone to pound of calf is an important factor in calving ease.

The average head circumference for this year's sale bulls is 47 cm. The average birth weight is 83.7 pounds. We hope that that measurement, along with the birth weight and calving ease direct (CED) EPD will be beneficial to you in determining the calvability of the bulls in the sale offering.

The Cross Diamond Cornerstones...

The foundation of our breeding program has been impeccable fertility, sound udders, quiet dispositions and overall structural integrity... these cows aren't delicate flowers-- they're bold herd movers!

Robin 4135-- Dam of Lots 57, 60, 64, 66, 68 & 69. This legendary cow makes sustained performance look easy. She's gentle, fertile, sound and beautiful. MPPA on 14 calves- 102. Embryos available.

Sandcherry 125-- Dam of Lot 41. Small, but mighty! She has a 102.5 MPPA on 6 calves.

Gypsy 7086-- Granddam of Lots 53. Small framed, low input and easy-keeping. She's the pattern for the future. Embryos available.

Roseanne 029-- Dam of Lot 9. A gorgeous testament to her pedigree. We lost 029 to lightning this summer, but not before realizing her greatness.

Constance 290-- Dam of Lot 92. There's power in this atlas-bred cow! She always brings in a calf made for performance.

Robin 715-- Dam of Lot 88. She's not just another pretty cow-- she has the depth and superior structure that we like. 715 has been a consistent producer in her 12 year career. Dam of Gypsy 1041, left.

Sunny 001-- Dam of Lot 85. High mass cow. She's solid in looks and production.

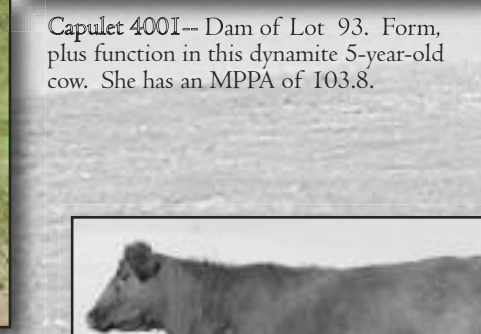

Georgia 215-- Dam Lot 20. A great producer--MPPA of 104.2. 4001, at right is a daughter.

Opal 3394-- Dam of Lot 101. A larger-framed cow, this Red Option/Make My Day cow has a great udder and brings in a whopper of a calf each year.

Big Girl II 933-- Dam of Lot 55. A broody cow with a lot of depth and mass. Her MPPA on 6 calves is 103.

Capulet 4001-- Dam of Lot 93. Form, plus function in this dynamite 5-year-old cow. She has an MPPA of 103.8.

Gypsy 044-- Dam of Lot 16. An easy-keeper, 044 is moderate, functional and easily sustainable.

Gypsy 1041-- Dam of Lots 12 & 148. She raised both well! A broody, well-made female.

Robin 721-- Dam of Lot 149. 721 has been a quiet powerhouse in the herd, consistently producing offspring as structurally perfect as she is.

Grand Lady 1655-- Granddam of Lot 2. A deep, angular cow with a great production record: 108 MPPA.

Constance 2037-- Granddam of Lot 84. A bold example of the feminine, yet powerful influence of 8029 on the Cross Diamond herd.

Belle 8029-- Great granddam of Lots 84 and 152. The herd matriarch-- at 21 years of age. Her MPPA on 17 calves is 103. She has a great udder and flawless feet. Embryos available.

Samie 3331--Dam of Lot 5. This high production female puts it all together... along with a 105.5 MPPA.

Nina 2122-- Dam of Lot 95 and herd bull Romeo 478. She's a low maintenance 737 daughter who quietly goes about her business of keeping us in business.
